ORGANIC FROZEN COCONUT WATER CONCENTRATE 60 BRIX

Rosun Natural Products-Making Food How Nature Intended

Science-Based Health Benefits of Coconut Water

- Good source of several nutrients
- May have antioxidant properties
- May help lower blood sugar for people living with diabetes
- May help prevent kidney stones
- May support heart health
- Beneficial after prolonged exercise
- Delicious source of hydration

Description

Our Frozen Coconut Water Concentrate contains all five of the essential electrolytes (calcium, potassium, phosphorous, magnesium and sodium) needed for effective rehydration. Coconut water is especially rich in potassium which is more than the amount of potassium found in leading sports and energy drinks, thus delivering faster rehydration. It has no sugar added, no artificial preservatives, color, and flavors.

Product Process

The coconut water extracted from mature coconuts is mechanically filtered to remove any solid coconut meat particles. The coconut water is centrifuged to separate the water and the residual oil. The purified coconut water is pasteurized to kill any pathogens. The water then undergoes a proprietary multi-stage evaporation process that preserves its taste and natural nutrients, and is concentrated to 60° Brix.

Packaging

Bag-in-Drum (BID) – 265 KG

Rosun Coconuts Products Company is dedicated to sustainability and purity in manufacturing, carefully selecting quality raw materials to bring the most nutritious products in the world to you. We are committed to produce the highest quality food ingredients, herbal phytonutrients and healthcare products how nature intended - free from herbicides, pesticides, toxins and chemicals, with nothing synthetic added - ever.
